

A new server: imagen2.cea.fr

The new **imagen2.cea.fr** server is taking over from the original XNAT server **imagen.cea.fr**. The new server can be accessed through the HTTPS and SFTP protocols.

- Data is encrypted when transmitted over the Internet, both with HTTPS and SFTP.
- You need to sign up for a new user account on the new server. User names and passwords on the new server are different from to user names and passwords on the old XNAT server.

For [HTTPS](#), use any web browser:

```
https://imagen2.cea.fr/
```

For [SFTP](#), use software such as [FileZilla](#) or [WinSCP](#), or *lftp* on Linux:

```
lftp -u <username> sftp://imagen2.cea.fr/
```

FU2 data are made available on this new server as they are collected and processed, alongside with the corresponding BL and FU1 data.

Upload FU2 data

FU2 data can be uploaded to the new **imagen2.cea.fr** server, through SFTP only and typically into directory `upload/<center>`:

```
lftp -u <username> sftp://imagen2.cea.fr/upload/<center>
```

If you want to upload data, first send a mail to imagedatabase@cea.fr asking us to create or give you access to a directory you can write into.

Access recent data

FU2 data are made available on the new **imagen2.cea.fr** server as they are collected and processed, alongside with the corresponding BL and FU1 data. Most up-to-date BL/FU1 data are available from this new server, especially questionnaires that have been modified since 2011:

<https://imagen2.cea.fr>

As of this writing **no quality control has been performed** on the FU2 data.

Access old BL/FU1 data

The whole BL/FU1 data frozen in its 2011 state is available on the legacy XNAT **imagen.cea.fr** server:

<https://imagen.cea.fr>

Most up-to-date BL/FU1 data are available from the new **imagen2.cea.fr** server.
